

The Wright Face & Tracheostomy Nebulizing Mask simultaneously moisturizes the nose, mouth, sinus cavity & tracheotomy reducing treatment time & returning upper airway to 'pre-tracheotomy' humidity. Addressing the major issues such as pneumonia, infection & mucus, the Wright Mask also sufficiently hydrates tissue & cells which have an impact on the reduction of headaches, vocal clarity and overall patient comfort.

comfort

Assembly Instructions:

1. Insert Face Mask tube into one end of adjustable Tee (A)
2. Insert Trach Mask tube into other end of adjustable Tee (B)
3. Put Face Mask on face and adjust straps (C)
4. Put Trach Mask over Trach, adjust straps (D)
5. Adjust Tee to fit Face & Trach (E)
6. Attach hosing (F) to nebulizing container (G) *note (F) & (G) not included.

convenience

the WRIGHT FACE and TRACHEOSTOMY NEBULIZING MASK benefits

- Convenient simultaneous-humidification of upper airway & tracheostomy
- Encourages Patient Compliance
- Keeps mucus/secretions thin & flowing
- Improves tissue health & patency
- Reduces Potentially Preventable Complications
- Reduces painful dry sinus tissue
- Reduces life threatening plugs
- Reduces infections
- Reduces sleeping difficulty
- Reduces agitation
- Reduces malaise
- Reduces Tracheostomy Assisted Pneumonia (TAP)
- Enhances Chronic Care
- Reduces length of stay
- Reduces healthcare costs
- Enhances quality of care
- Improves quality of life
- Covered by Medicare/Medicaid
- Adjustable
- Disposable
- Reduces carbon footprint

Staff Benefits

- ★ Saves Clinician time
- ★ Reduces PPC re-admissions
- ★ Reduces malaise re-admissions
- ★ The Wright tool to reduce mortality rates from chronic complications
- ★ Improved departmental performance

Facility Benefits

- ✓ The Wright Mask is a powerful 'action strategy' to reduce length of stay & quicken patient discharge
- ✓ Improves facility's best pay profile
- ✓ Reduces non-reimbursed expenses
- ✓ Increases PPC Profile
- ✓ Improves financial performances
- ✓ Promotes meeting requirements set forth in the 'Patient Protection and Affordable Care Act'

healthcare reform

When the Wright Face & Tracheostomy Nebulizing Mask delivery system is implemented into your chronic care & quality of care programs, your staff and the facility will meet the requirements set forth in the 'Patient Protection and Affordable Care Act' aka H.R. 3590.

Sec. 2717 - ENSURING THE QUALITY OF CARE (pg 26) Improve health outcomes and prevent hospital re-admissions through implementation of Wright Mask - simultaneous humidification

Sec. 2718 - BRINGING DOWN THE COST OF HEALTH CARE COVERAGE (pg 30) Standard items/services charges will decrease as preventable hospitalizations & re-admissions costs decrease as patients use the Wright Mask.

Sec. 3024 - INDEPENDENCE AT HOME DEMONSTRATION PROGRAM (pg 764) The Wright Mask is the quintessential device to assist patient compliance & enhance patient health between team home visits.

Sec. 3025 - HOSPITAL RE-ADMISSIONS REDUCTION PROGRAM (pg 775) Utilizing the Wright Mask in tracheotomy treatments will assist in reducing re-admissions, thus avoiding reduced (discharge) payments from HHS to hospitals that have excess re-admissions.

Sec. 3501 - HEALTH CARE QUALITY IMPROVEMENT PROGRAMS (pg 1053) The Wright Mask brings an innovative methodology & strategy for quality improvement practices.

What they think of the Wright Mask...

"Very nice. Good job!" – Dr. Glenn E. Green, Assist. Prof. University of Michigan Health System

"Novel idea!" Dr. George D. Lyle, Winter Haven, FL

"Impressive!" Dr. Edward J. Damrose, Assist. Prof., Stanford University Sch of Medicine, Stanford, CA

"Great job. I'm surprised someone hadn't invented it before. Upper airway dryness in tracheostomy patients is a real concern. Thanks for inventing this. I'll mention it to other ENTs I know!"

Dr. James W. Ochi, Children's ENT of San Diego

"Great innovation to combine both! There hasn't been enough attention to the sinus cavity and upper airway. The Wright Mask will change that!" – Mathew Bergin, Paramedic, San Diego

"Exactly what our (trached) patients need. This should be fast-tracked everywhere!" Suzanne Rogers, RN, ENT Clinic, Vancouver, BC Canada

"What an inspiration! Our patients need this!" Dr. Oscar Terraza, Otorhinolaryngologist, Guatemala

"We perform a tracheotomy a week. This'll help!" Dr. Zaheer Alvi, Saskatoon, Saskatchewan, Canada

"Humidity's important for upper & lower airway!" Dr. M. Rashid Chaudhry, Brookdale U Hospital, Brooklyn, NY

"Very Impressive!" Dr. Mark P. Clemons, Memphis, TN

"Our peds need this!" Dr. Rhonda Homaker, Indianapolis, IN

"Very interesting. Logical. Send me a sample." Dr. Norman Harris, Assistant Clinical Prof., Dept of Otolaryngology, U of CA, Irvine

"Reduce (ua) dryness. Reduce re-admittance." Dr. Jorge Secin, Buenos Aires, Argentina

"Winter's dreadful. They're so dry. This'll help!" Dr. John R. Stram, Boston Medical Center, Boston University

"This is needed! Not only in dry climates but also humid climates! It's needed!" Dr. Villatoro Paz, Acapulco, Mexico

"Thank you for inventing it!" Dr. Andrew Patel, U of CA, San Diego, Sch of Medicine, Dept of Otolaryngology, Head & Neck Surgery
