

# THE WRIGHT FACE & TRACHEOSTOMY NEBULIZING MASK

## BENEFITS

With compliant use, the easy to use Wright Face and Tracheostomy Nebulizing delivery system simultaneously moisturizes the upper and lower airways reducing tissue-dryness, mucous plugs, pneumonia-causing bacteria, sleep apnea, general discomfort suffered by Tracheostomy patients, including petulance.

The Wright Mask is a superior addition to the tracheostomy patient's daily hygiene regiment, as it replaces much needed moisture at the cellular level. With regular use, The Wright Mask delivery system will result in long-term relief, unlike the short-term temporary satisfaction one experiences from over-the-counter oral gels, mouth sprays and lozenges.

The Wright Mask humidification delivery system's efficacy brings patient comfort. Patient comfort encourages patient compliance. Compliance is a key to reducing readmissions.

## Respiratory Therapy

### THE JOURNAL OF PULMONARY TECHNIQUE

Partnership For Patients: Next Step - Preventing Tracheostomy Associated Infections (Tai) And Complications - Respiratory Therapy Vol 6 No 4 - Aug-Sept 2011

Reducing Pprs (Potentially Preventable Readmissions): Tracheostomy Management Services Averts Readmissions - Respiratory Therapy Vol 6 No 3 - June-July 2011

Tracheostomy Care: The Importance Of Humidification At Home - Respiratory Therapy Vol 5 No 6 - Dec-Jan 2010/2011

- Convenient
- Adjustable
- Disposable
- Simultaneously humidifies oral, nasal cavities & tracheostomy
- For home, LTC or hospital use

Custom designed, the Wright Mask is recommended for short term & long term tracheostomy patients.

*The mission of The Wright Mask is to improve the patient & caregiver's quality of life by reducing &/or eliminating the underlying PPCs that frequently cause patient re-admissions. The Wright Face & Tracheostomy Nebulizing Mask delivery system will enable the patient to reach that 'quality of life' goal.*

## CLINICIANS

### *Tracheostomy Team Members*

*ENT/Otolaryngology Surgeons*

*Head & Neck Nurses*

*Respiratory Therapists*

*Speech Pathologists*

*Physician Assistants*

*Visiting Home Nurses*

*Cardio-Pulmonary Specialists*

*Acute Care Specialists*

*Chronic Care Specialists*

*LTC/Nursing Home Specialists*

*Caregivers & Patients*

***The Wright Mask delivery system benefits you, your facility and your patients. With compliant patient use, this airway moisturizing system:***

*Saves time*

*Reduces PPC profile (Potentially Preventable Complications)*

*Reduces readmissions from PPCs*

*Reduces LOS (Length Of Stay)*

*Quickens patient discharges*

*Compliments quality of care*

*Enhances transition to home or LTC (long term care)*

## PATIENTS

### *Nebulizing/Humidifying*

#### ***How often should one Nebulize?***

*Most Respiratory professionals agree, in order to maintain healthy airways humidification of the nose, mouth, tracheostomy should be carried out regularly. Your respiratory team will advise you how often to nebulize.*

#### ***Symptoms when one doesn't Nebulize***

*The tissues in your trachea, nasal & oral passages, sinus cavity & mouth become dry - dehydrated.*

*Oral gels & nasal sprays are temporary superficial cures from the discomfort of 'Dry Mouth'. The Wright Mask replaces the natural moisture balance of the upper and lower airways.*

*Without sufficient moisture, mucus secretions become thick, sticky and stringy. Difficult and painful to expel, secretions can form Mucus Plugs blocking airway passages, and result in respiratory infection &/or pneumonia.*

*Lack of sufficient airway hydration effects sleep, appetite, mood. Headaches, tired eyes & sinus pressure are common when one's natural balance of airway-moisture is depleted.*

*Nebulizing-Compliance is your key to improving how you feel.*
